

iOS Developer - Iphone/Ipad App Developer (Remote)

(San Francisco - Silicon Valley Company)

iOS Developer

A software development company has a job opening for an iOS developer to join their growing team. They are a software solutions provider that is helping numerous companies, both big and small, with their iOS and developing needs.

You would be joining a small, collaborative group of highly skilled software engineers that would allow you to both learn, and take the lead on different projects. They have the stability of a large company, with the feel of a start-up. Their ideal candidate would have experience building native iOS applications and could come in and hit the ground running.

This is a remote based position working 20-25, the ideal candidate is a self-starter that is highly motivated and results driven. Communication is key in this position both verbal and written. Strong skills and experience using Objective C, Cocoa Touch, Xcode, iOS SDK,

Web Services and APIs are a must.

Required Skills

- 1-4+ years of IOS app building experience
- Experience Objective C, Cocoa Touch, iPhone SDK, Xcode
- Experience with Web Services (REST, SOAP, JSON XML)
- Experience with APIs (Twitter, Facebook, Google Maps)
- Experience with Core Data and Core Graphics frameworks
- Software development skills like php, Java, and Javascript a plus
- Android experience a plus.

Depending on experience this will pay between an hourly wage of \$28-\$36

NOTE: Please make sure you provide your resume, and a cover letter including links to previous related work. Those meeting this will be given an initial look
